**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2 and 3 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant has not defined the amount in these claims.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Abe et al. (PN 6,246,646).

In figure 2 Abe et al illustrates a focus control apparatus having a pulse generator, a variable voltage generator coupled to a storage medium.

***Allowable Subject Matter***

Claims 3-11 and 14-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding claims 3-11.

None of the prior arts alone or in combination discloses the structural combination of claim 3 in particular the limitation of having an analog temporal placement control voltage.

None of the prior arts alone or in combination discloses the structural combination of claim 5 in particular having an analog duration comparator.

Regarding claims 14-15.

None of the prior arts alone or in combination discloses the method steps of claim 14 in particular the step of generating analog temporal placement control voltage.
